2024_28_III_OOPS Using Java Lab

2028_REC_OOPS using Java_Week 12_Q3

Attempt : 1
Total Mark : 10
Marks Obtained : 10

Section 1 : Coding

1. Problem Statement

In the mystical realm of programming, there exists a magical incantation to reveal hidden words.

Elara, the skilled enchantress, wishes to summon a word using her spell and then reverse its characters to uncover its enchanted reflection.

Write a program that uses the predefined functional interface Supplier<String> and a lambda expression to:

Supply (generate) a string, and

Display its reversed form.

Input Format

No input is required from the user.

The string must be supplied internally using a Supplier<String>.

Output Format

Print the reversed version of the supplied string.

Refer to the sample output for formatting specifications.

Sample Test Case

Input: Wizard!!
Output: !!draziW

Answer

```
import java.util.Scanner;
import java.util.function.Supplier;

class EnchantedReflection {
    public static void main(String[] args) {
        Scanner sc = new Scanner(System.in);
        String  a = sc.nextLine();
        Supplier<String> spellSupplier = () ->a; // "Wizard!!";

        String spell = spellSupplier.get();

        String reversedSpell = new StringBuilder(spell).reverse().toString();

        System.out.println(reversedSpell);
    }
}
```
